April 2006

It is finally Spring! The flowers are blooming and the "birds are chirping" here at TECHNALOCK. This year has been an exciting and busy year so far and we owe it all to our loyal customers! Many new and exciting things have been happening around here, such as the addition of our love birds (see our special feature section for more information) and new products!

Featured Product

Revolve-a-Lock is a **revolution** in security. It is unique because it does not rely on the ever changing sizes of the built-in security slot. Revolve-a-Lock simply installs directly into existing screw, VGA, LPT, or COM ports. In addition, the locking mechanism twists firmly into equipment for a more snug fit and costs less than many other locks of this type on the market today. Revolve-a-Lock is perfect for securing laptops, desktops,

cameras, camcorders and much more. It comes available in three sizes (laptop, desktop, and camera) and is available keyed-alike or keyed-different for your convenience.

(See our 2006 catalog or visit us online for more information.)

To our loyal TECHNALOCK newsletter readers we are offering free shipping!

This coupon is good for free shipping on one order (any quantity).

Please reference coupon number, # NLFSS3106 when ordering to qualify.

Expires May 31, 2006

Testimonial

This month, we are pleased to share a success story with our customers. Recently an employee working for a barge company told us this story...

"Workers on our boats have TV's, VCR's and other electronics in their cabins. I was concerned about my equipment being left aboard when we were off the boat for various things, so I contacted TECHNALOCK. You recommended the AV-Safe to me. As soon as I got it, I installed it on both my TV & VCR. Only a month later, while our boat was in the yard being worked on, someone came aboard and stole every single electronic item from every cabin - except mine! Needless to say, there will be other people calling you!"

Glad we could help! Do you have a success story you would like to share? Email your story to

customerservice@technalock.com

Special Feature

NOISE ALERT!

TECHNALOCK is officially an avian paradise. As you may already know, Customer Service adopted two lovebirds. If you call our 800 number, you will surely hear them in the background (we use to think the finches were noisy!).

After much debate and customer input, we named these two Joanie & Chachi. They definitely live up the office and we absolutely love them. We hope you enjoy the pictures.

Finch Update!

Romeo, Julia, M&M & Lil' Kim are doing great as well. If you were wondering, the babies, M&M & Lil' Kim, have not changed much in recent weeks, so we haven't sent any updates.

Feel free to check in on our bird friends anytime - we love sharing them with our customers. You can email us at

customerservice@technalock.com for updates.
